-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 10-11 and 14 are rejected under 35 U.S.C. 102(b) as anticipated by Fischell et al or, in the alternative, under 35 U.S.C. 103(a) as obvious over Fischell et al in view of Suthanthiran et al.

Fischell et al disclose a stent having a radioactive isotope fixed on the surface of the stent. Fischell et al teaches that the radioactive isotope can be plated onto the surface which would inherently have some adhesive properties in order for the isotope to remain attached to the stent. However while Fischell et al does not specifically state the use of an adhesive, Suthanthiran et al teaches a radioactive device used in the body and specifically teaches that it is known to fix an adhesive layer onto a carrier by use of an adhesive (column 5, lines 39-45). Therefore a modification of Fischell et al such that the radioactive isotope is attached to the surface of a stent in any well know manner to one skilled in the art would have been obvious. Fischell et al also teaches that it is

Art Unit: 3736

known to use different radioactive isotopes (alpha, beta, gamma) depending on the desired use and does teach Gold (Au) as one that is known to be used.

4. Claims 12-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fischell et al and Suthanthiran et al.

With respect to claims 12-13 to use any well known adhesive to attach the radioactive isotope would have been obvious based upon the suitability for the intended use.
